DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1- 3, 5-9, 12-15, 17-18, 20 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by DRASLER et al (6,245,101).

As to claims 1-3, 5-9, 12-15, 17-18, 20 and 22, DRASLER (Fig. 5, 28) discloses a medical apparatus in a hollow cylinder configuration with open cells formed by longitudinal members or circumferentially spaced beams 10, which join at merge sections/connection points 100 as recited in the claims. DRASLER medical apparatus meets all structural limitations as recited in the claims because at least a pair of adjacent longitudinal members 10 each has a circumferential width 105 less than a radial thickness 115 (Fig. 5).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 3731

2. Claims 10, 19 and 23 are rejected under 35 U.S.C. 103(a) as being unpatentable over DRASLER et al (6,245,101) in view of TAHERI (5,617,878).

As to claim 10 and 23, DRASLER discloses substantially all structural limitations as recited in the claim, except for a conical shape of the medical device in an expanded condition. TAHERI (Fig. 13; col. 5, lines 25-34) discloses conical stent 40 for an artery having a decreasing diameter. It would have been obvious to one of ordinary skill in the art at the time the invention was made to make CHUTER device having a conical shape for an artery having a decreasing diameter.

As to claim 19, it would have been obvious to one of ordinary skill in the art at the time the invention was made to size the beam as recited in the claim because changing the size/dimension of an component as one desires is quite within level of one of ordinary skill in the art.

Response to Amendment

The amendment filed on 4/21/2004 under 37 CFR 1.131 has further defined the present invention but is not defined over new reference DRASLER et al (6,245,101) as indicated in the above rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3731

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vy Q. Bui whose telephone number is 571-272-4692. The examiner can normally be reached on Monday-Tuesday and Thursday-Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anhtuan T Nguyen can be reached on 571-272-4963. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
